Applicable for QR5IP

---

**LIMITATIONS OF LIABILITY**

This manual is subject to change without notice.

Pach and Company is not liable for any errors that might occur from use of this document, nor is any commitment to update the information herein implied.

Pach and Company does not assume any liability for any damages, which may arise in installation or use of the Quantum QR5-QR5FF-QR5IP-QR5IPFF. Pach and Company does not assume liability for any incompatibility between the Quantum QR5-QR5FF-QR5IP-QR5IPFF and users devices.

Pach & Company reserves the right to make changes without prior notice to any products in order to improve reliability, function or design.

**PRODUCTS LIMITED WARRANTY**

If your product does not work properly because of a defect in materials or workmanship, Pach and Company (referred to as the warrantor) will, for the length of the period indicated on the chart below, which starts with the date of original purchase (Limited Warranty Period), at its option either (a) repair your product with new or refurbished parts or (b) advance replacement with new or refurbished product. The decision to repair or advance replacement will be made by the warrantor. Advance replacement will be ship UPS ground under the warranty period with no charge. The defective product must be return to Pach and Company within 15 days after receiving the advanced replacement otherwise you will be billed the full amount.

**Parts:** Two (2) year, does not cover parts needed to re-install the product by the installer

**Labor:** Two (2) year, does not cover installation labor

Cards, Fobs and Transmitters warranted for 90 days

**LIMITED WARRANTY LIMITS AND EXCLUSIONS**

This limited warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage.
The Limited Warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which result from accidents, misuse, abuse, neglect, bug infestation, mishandling, misapplication, alteration, faulty installation, setup adjustment, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, introduction to sand, humidity or liquids or product has been installed by non-license installer or damage that is attributable to acts of God.

ADVANCE REPLACEMENT can only be issued by Pach and Company Technical Department free of charge and transport by standard transportation (UPS Ground, Standard US mail, whichever is applicable). Our Technical Department has the right to decline advance replacement. It is your responsibility to return the defective part at your cost.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER LIMITED WARRANTY COVERAGE. THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR RISING OUT OF ANY BREACH OF THIS LIMITED WARRANTY. (As examples, this excludes damages for lost time, lost calls or messages, cost of having a unit removed or re-install if applicable, travel to and from the servicer.

ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitation on how long an implied warranty lasts, so the exclusions may not apply to you. This Limited Warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the Limited Warranty period, you may contact your dealer/installer. If the problem is not handled to your satisfaction, then call Pach and Company at 1-888-678-7224.

PARTS AND SERVICE, WHICH ARE NOT COVERED BY LIMITED WARRANTY, ARE YOUR RESPONSIBILITY.

CHAPTER 1
Getting Started

Introduction

Pach & Company thanks and congratulates you on the purchase of your Quantum QR5-QR5FF-QR5IP-QR5IPFF Telephone Entry Access Control Systems.

The manual is designed to guide you through the proper programming and use of the Quantum QR5-QR5FF-QR5IP-QR5IPFF. It is important for you to read and follow the manual completely.

The product comes with two years Limited Warranty, see above for more detail

System Descriptions

The Quantum QR5-QR5FF-QR5IP-QR5IPFF is residential and multi tenant telephone entry system. It can be installed as follows:

1. Intercom mode, using existing phone line, no dial tone is required.
2. Intercom mode on existing active phone line, the system will call the premises phone as an intercom and up to 10 tenant directories can be programmed to call to outside lines
3. **Dedicated phone line**, system only can call an outside line; up to 10 tenant directories can be programmed.

See Chapter 2 for more detail

**Specifications**

**Input power:** 12VAC 40VA (12VAC supplied), 12VDC 3.0A  
**Minimal Current consumption:** 750-100mA  
**DIMENSION:** 6-7/16 (H) x 10 (W) x 2-1/16 (D)  
1x16 Liquid Crystal Display (LCD)  
Built-in 26 Bit Wiegand Card Reader  
RS-485 for Satellite system (up to eight satellite)  
Two on-board relays  
Two Auxiliary inputs  
Operating environment 10°F-140°F  
Relative Humidity 0%-95% non-condensing  
Double 3/4" knock-out on the back and bottom panel

**Features**

Optional Internet Browser Programming (QWCM)  
Event recording  
Automatic Enrollment  
Automatic call forwarding, intercom mode on existing active phone line  
200 total cards or transmitters and 200 access codes (4-8 digit)  
20 programmable time zones, 10 programmable auto-unlock schedules and 20 holiday schedules  
10 programmable temporary cards and access codes for limited use  
10 programmable unlock hold cards and access codes  
Program blocks of cards and blocks of codes

**Accessories and Replacement parts**

Visit our web site [www.pach-co.com](http://www.pach-co.com)

**Unpacking the System**

All the items below come with the Quantum QR5-QR5FF-QR5IP-QR5IPFF. Contact Pach and Company for missing part(s) at (888) 678-7224, Monday-Friday 7:30 AM -3:30 PM Pacific Standard Time.
CHAPTER 2
Installation and Wiring Diagram

Follow the wiring diagram carefully. Improper installation will void the warranty. Please call technical support in case you have any difficulties during the installation. Click the selection below for different applications:

CALL, ENTER, EXCEPT PROGRAM
CHAPTER 4
Programming

Log-in to Programming Mode

1. Press 0 and # simultaneously, then release, the welcome screen will stop scrolling.

2. Enter 4-digit master code (default=0000) then press # (if you do not know the master code, see chapter 2 step 8)

Function Code 00 - Change Master Code

1. Log-in to programming

2. Enter 00 then #

3. Enter new master code then press #

Function code 01 - Add New Tenant Directory

A tenant directory consists of directory code (0-9), tenant's name and phone number. Up to 10 tenant directories can be programmed.

1. Log-in to programming

2. Enter 01 then #

3. Enter directory number 0-9 (directory is in single digit and cannot be changed) then #

see Chapter 3 for keypad layout

4. Enter name up to 16 characters (name can be a person real name, apartment number, etc., directory will be sorted in alphabetical order) then press #
5. Enter the tenant phone number up to 16-digit (phone number can be land line number, cellular number or Voice over IP (VOIP) number. Note: VOIP phones may have problems releasing door) then press #.

Return to step 3 to enter another tenant directory

Function Code 02 - Edit Existing Tenant Directory

1. **Log-in to programming**

2. Enter 02 then #, the display will show

```
FWD DIR(0-9):0
```

3. Enter tenant directory number to be edited then #

```
NAME
```

```
PACH AND COMPANY
```

Enter new name up to 16 characters then press # or press # without entering anything to keep the existing name

```
PHONE NUM
```

---

see [Chapter 3](#) for keypad layout

4. Enter the a new tenant phone number up to 16-digit then press # or press # without entering anything to keep the existing number.

Return to step 3 to edit another tenant directory

Function Code 03 - Delete Tenant Directory

1. **Log-in to programming**

2. Enter 03 then #

```
DEL FWD(0-9):-
```

3. Enter the tenant directory to be deleted (0-9) then press #
Function Code 04 - Clear All Tenant Directories

1. Log-in to programming
2. Enter 04 then #
3. Do the following:
   - Press 1 (to clear all directories) then press#
   - Press * to cancel

Function Code 05 - Call Forwarding

Use function code 30 to enable

Function Code 06 - Add New Access Code

An access code is a keyless entry code to unlock the door. An access code can be programmed in 4, 5, 6, 7, or 8 digits, see function code 09 to change the access code’s number of digits. Up to 100 access codes can be programmed.

1. Log-in to programming
2. Enter 06 then #
3. Enter the access code (4-8 digit, see function code 09), then press #
4. Enter name up to 16 characters, then press #
5. Enter door 1 or 2, or 3 for both, then press #

6. Enter time zone 1-3 then press #

7. Enter 00 (24 hours) - 20 see function code 17 then press #

8. Enter satellite system ID 0-7 (enter 0 if no satellite connected to the QR5) then press #

9. Enter
   0= no more additional time zone then press # and return to step 3 to program another access code
   1= add additional time zone then press # and return to step 6
   *= exit programming

**Function Code 07 - Delete Access Code**

1. Log-in to programming

2. Enter 07 then #

3. Enter code to be deleted then press #

   **CODE DELETED** if access code exists
   **CODE NOT EXIST** if access code does not exist

   Repeat this step to delete another code

**Function Code 08 - Clear All Access Codes**
1. **Log-in to programming**

2. Enter 07 then 

   ![CLR ALL CODE(1)]

3. Enter 1 to clear all access code then press 

   ![ALL CODE CLEARED] or *

   * to cancel

**Function Code 09 - Access Code Digit**

1. **Log-in to programming**

2. Enter 09 then 

   ![CODE DIGIT: 4]

3. Enter 4, 5, 6, 7 or 8 (default setting is 4 digit) then press 

**Function Code 10 - Add New Card or Transmitter**

*A maximum of 100 cards or transmitters can be programmed into the Quantum QR5-QR5FF-QR5IP-QR5IPFF.*

1. **Log-in to programming**

2. Enter 10 then 

   ![NEWCARD: _ _ _ _ _ _ _ _]

3. Present the card in front of the card reader black window, the number will register automatically (or enter the last 8 digits of the number on the card) then press # or press the transmitter button (the number will automatically register) then press 

   ![NAME]

   see **Chapter 3** for keypad layout

4. Enter name up to 16 characters then press #
5. Enter door 1 or 2, or 3 for both then press #

6. Enter time zone 1-3 then press #

7. Enter 00 (24 hours) - 20 see function code 17 then press #

8. Enter satellite system ID 0-7 (enter 0 if no satellite connected to the QR5) then press #

9. Enter 
   0= no more additional time zone then press # and return to step 3 to add program another card
   1= add additional time zone then press # and return to step 6
   *= exit programming

**Function Code 11 - Delete Card or Transmitter**

1. Log-in to programming

2. Enter 11 then#

3. Present the card in front of the card reader black window, the number will register automatically (or enter the last 8-digits of the number on the card) then press #

   - **CARD DELETED** if card exists
   - **CARD NOT EXIST** if card does not exist

   Repeat this step to delete another code

**Function Code 12 - Clear All Cards or Transmitters**
Function Code 13 - Set Time

1. Log-in to programming
2. Enter 13 then #
3. Enter
   HH = in military time
   MM = minute
   then press #

Function Code 14 - Set Date

1. Log-in to programming
2. Enter 14 then #
3. Enter YYYY/MM/DD
   YYYY = year
   MM = Month
   DD = Date
   then press #

   DAY(0=SUN): 2
4. Enter
   0 = Sunday, 1 = Monday, 2 = Tuesday, 3 = Wednesday, 4 = Thursday, 5 = Friday, 6 = Saturday
   then press #

   DAYLIGHT(0-1):1

5. Enter 0 = NO Daylight Saving Zone (Hawaii, Indiana and Arizona) 1 = Daylight Saving Zone
   then press #

   Function Code 15 - Initializing Event recording

   The events are stored in the RAM buffer. The Event RAM buffer can hold 2000 events. The Events are stored as first in first out (FIFO). This function code will clear the event buffer.

   1. Log-in to programming
   2. Enter 15 then #

   EVENT INIT(1):__

   Enter 1 then # to clear event buffer

   INIT EVENT BUF...
   or

   * to cancel deletion

   Function Code 16 - Auto Unlock Schedule (AUS)

   Unlocking and locking the door as program automatically. If the open time is 06:00 and close time 18:00, door 1, 2 or both will unlock at 06:00 am and close at 06:00 pm. 10 AUS can be programmed.

   1. Log-in to programming
   2. Enter 16 then #

   AUS NO(0-9):__

   3. Enter AUS (0-9) then press #

   ADD=1 DEL=0:__

   4. Enter
   0 = Delete the existing AUS the press #

   DELETED
1 = Add AUS then press #

5. Enter open time in military then press #

6. Enter close time in military then press #

7. Enter
   0 = Sunday, 1 = Monday, 2 = Tuesday, 3 = Wednesday, 4 = Thursday, 5 = Friday, 6 = Saturday
   then press #

8. Enter
   1 = Relay 1 (door 1)
   2 = Relay 2 (door 2)
   3 = Both relay 1 and 2
   then press #

9. Return to step 3 to enter another AUS

---

Function Code 17 - Time Zone (TMZ)

A maximum of 20 Time Zone can be programmed and up to three time zone can be assigned to each access code or card to allow access during a certain time of the day.

1. Log-in to programming

2. Enter 17 then #

3. Enter 01-20 (00=24 hours access automatically) then press #

4. Enter
   0 = Delete the existing time zone then press #
1. Log-in to programming

2. Enter 18 then #

3. Enter 01-20 then press #

4. Enter

   0= Delete the existing holiday zone then press #

   or

   1= add new holiday zone then press #

**Function Code 18 - Holiday Zone (HLD)**

_HLD is to ever ride Time Zone (TMZ) and Auto Unlock Schedule (AUS) during the holidays. Up to 20 Holiday Zone can be programmed_

1. Log-in to programming

2. Enter 18 then #

3. Enter 01-20 then press #

4. Enter

   0= Delete the existing holiday zone then press #

   or

   1= add new holiday zone then press #
5. Enter month and date (i.e. 0704 for U.S.A Independence Day) then press #
Return to step 3 to add more holiday zones.

**Function Code 20 - AUXIN1**

*AUXIN1 is used for input device such as postal lock, infrared sensor, exit button, etc..* *AUXIN1 is associated with relay 1*

1. **Log-in to programming**

2. Enter 20 then #

![AUXIN1:0](image)

3. Enter
   - 0= disable (default setting)
   - 1= Enable control by relay 1 open door interval, see function code 28
   - 2= relay 1 control by AUXIN1 then press #

**Function Code 21 - AUXIN2**

*AUXIN2 is used for input device such as postal lock, infrared sensor, exit button, etc..* *AUXIN2 is associated with relay 2*

1. **Log-in to programming**

2. Enter 21 then #

![AUXIN2:0](image)

3. Enter
   - 0= disable (default setting)
   - 1= Enable control by relay 2 open door interval, see function code 29
   - 2= relay 2 control by AUXIN2 then press #

**Function Code 22 - Do Not Disturb**

*If the Do Not Disturb is enabled visitors can't call from the system*

1. **Log-in to programming**

2. Enter 21 then #
3. Enter 0= disable, 1= enable then press #

**Function Code 23 Lock-out Count**

*The system will be disabled in about 60 seconds after pressing invalid access code or swiping invalid card as specified on the Lock-out Count.*

1. Log-in to programming
2. Enter 23 then 
3. Enter 1-9 (default=3) then press #

**Function Code 24 Alarm**

*The system will make have warning alarm if invalid code or card has been enter according to the setting on function code 23.*

1. Log-in to programming
2. Enter 24 then 
3. Enter
   0= disable, 1=disable system for 60 seconds and local beep (default setting), 2= disable system for 60 seconds with no beep
   3= call directory (0-9) then press #

**Function Code 25 Keypad Beep**

*Turn the keypad press beep On or Off*

1. Log-in to programming
2. Enter 25 then 

3. Enter 0 = off, 1 = On (default) then press #

Function Code 26 Door Beep

*Turn the door beep On or Off*

1. Log-in to programming

2. Enter 26 then #

   ![DOOR BEEP(0-1):1]

3. Enter 0 = off, 1 = On (default) then press #

Function Code 27 Talk Time

*The amount of time the visitor can talk to the tenant. The timer starts as soon as the system is offhook.*

1. Log-in to programming

2. Enter 27 then #

   ![TALK TIME:060]

3. Enter 10-240 seconds then press #

Function Code 28 Unlock Relay 1 Time

*The amount of time for relay 1 to trigger.*

1. Log-in to programming

2. Enter 28 then #

   ![DOOR1 TIME:012]

3. Enter 01-99 (second) then press #

Function Code 29 Unlock Relay 2 Time

*The amount of time for relay 2 to trigger.*
1. **Log-in to programming**
2. Enter 29 then #
3. Enter 01-99 (second) then press #

### Function Code 30 Enable Automatic Call Forwarding

1. **Log-in to programming**
2. Enter 30 then #
3. Enter 0= disable (default) pr 1= enable then press #

### Function Code 31 Call Forwarding Time

*Intercom call can be forwarded to an outside line (land line, cellular phone) between 15-60 seconds. The call forwarding time must be set shorter than your voice mail or answering machine answers time otherwise it will not work. Automatic call forwarding will work if the system calls outside line. Outside line call forwarding is provided by your local telephone service.*

1. **Log-in to programming**
2. Enter 31 then #
3. Enter 15-60 (second) then press # (30 second= default)

### Function Code 32 Forwarding Directory

*10 Call forwarding directory can be programmed on the system but only one can be used as call forwarding directory.*

1. **Log-in to programming**
2. Enter 32 then #
3. Enter 0-9 then press #

Function Code 33 Temporary Code

The code will be expired after being used a certain amount of times specified (1-10 times) in the programming. Up to 10 temporary codes can be programmed.

1. Log-in to programming
2. Enter 33 then #

   TEMP CODE(0-1)

3. Enter 0= delete existing temporary code or 1= add temporary code then press #

   CODE NO(1-10): _ _

4. Enter code number 01-10 then press #

   NEWCODE:

5. Enter 4-8 digit code, see digit setting on function code 09

   NAME

   see Chapter 3 for keypad layout

6. Enter name then press #

   DOOR(1,2,3):

7. Enter 1= relay 1 (door 1), 2= relay 2 (door 2) or 3= both relay then press #

   TMZ SET(1-3):

8. Enter time zone set 1-3 then press #

   TMZ NO(0-20): _ _

9. Enter 00 (24 hours) - 20 see function code 17 then press #
10. Enter Sat id 0-7 then press # (enter 0 if no satellite connected to the QR5)

11. Enter
   0= no more additional time zone then press # and return to step 3 to program another temporary code
   1= add additional time zone then press # and return to step 8
   * = exit programming

Function Code 34 Special Code

The code can be use to unlock hold (open hold) and use same code again to lock (close) door or gate. Up to 10 special codes can be programmed.

1. Log-in to programming
2. Enter 34 then #
3. Enter 0= delete 1= add then press #
4. Enter code 01-10 then press #
5. Enter 4-8 digit code, see digit setting on function code 09
6. Enter name then press #
7. Enter 1= relay 1(door 1), 2= relay 2 (door 2) or 3= both relay then press #
8. Enter time zone 1-3 then press #

9. Enter 00 (24 hours) - 20 see function code 17 then press #

10. Enter Sat ID 0-7 then press # (enter 0 if no satellite connected to the QR5)

11. Enter
   0= no more additional time zone then press # and return to step 3 to program another temporary code
   1= add additional time zone then press # and return to step 8
   *= exit programming

Function Code 35 Temporary Card

The card will be expired after being used a certain amount of times specified (1-10 times) in the programming. Up to 10 temporary cards can be programmed.

1. Log-in to programming

2. Enter 35 then #

3. Enter 0= delete 1= add then press #

4. Enter card 01-10 then press #

5. Present the card or fob in front of the black window, the system will register the card or fob 8-digit number printed then press #
see Chapter 3 for keypad layout

6. Enter name and press #

**DOOR(1,2,3):**

7. Enter 1= relay 1 (door 1), 2= relay 2 (door 2) or 3= both relay then press #

**TMZ SET(1-3):**

8. Enter time zone 1-3 then press #

**TMZ NO(0-20):**

9. Enter 00 (24 hours) - 20 see function code 17 then press #

**SAT ID:**

10. Enter Sat ID 0-7 then press # (enter 0 if no satellite connected to the QR5)

**Another(0-1):**

11. Enter
   0= no more additional time zone then press # and return to step 3 to program another temporary code
   1= add additional time zone then press # and return to step 8
   *= exit programming

---

**Function code 36 Special Card**

The card can be used to unlock hold (open hold) and use same code again to lock (close) door or gate. Up to 10 special cards can be programmed.

1. Log-in to programming
2. Enter 36 then #

**SPEC CARD(0-1):**

3. Enter 0= delete 1= add then press #

**CARD NO(1-10):**

4. Enter code 01-10 then press #
5. Enter 4-8 digit code, see digit setting on function code 09

6. Present the card or fob in front of the black window, the system will register the card or fob 8-digit number printed then press #

7. Enter 1= relay 1 (door 1), 2= relay 2 (door 2) or 3= both relay then press #

8. Enter time zone 1-3 then press #

9. Enter 00 (24 hours) - 20 see function code 17 then press #

10. Enter Sat ID 0-7 then press # (enter 0 if no satellite connected to the QR5)

11. Enter
0= no more additional time zone then press # and return to step 3 to program another temporary code
1= add additional time zone then press # and return to step 8
* = exit programming

**Function Code 37 Initiate Premise Call**

Call into the system from the premise (intercom mode). By default # is used to call from the house phone to the system. If the # key is used by the phone company, you can change to **

1. Log-in to programming
2. Enter 37 then #
Function Code 38 System Acknowledge

The system will answer incoming outside call after the number of rings set. If the line associated with the system is connected to fax machine, alarm panel or any answering device. Disable this function.

1. Log-in to programming
2. Enter 38 then #
3. Press
   0= disable auto answer
   1-9= answer in 1-9 rings
   then press #

Function Code 39 Disable and Enable Remote Access

If no remote opening allow, disable it using this function code. Default setting is enabled.

1. Log-in to programming
2. Enter 39 then #
3. Press
   0= disable remote access
   1= enable remote access (default)
   then press #

Function Code 40 DTMF Relay 1

By default the DTMF remote opening relay 1 (door 1) key number is set to 9 means pressing 9 will remotely trigger relay 1 (door 1). The number can be changed by selecting 1-9 to trigger relay 1 (door 1). Note: by default remote access for relay 2 is set to 8, see function code 41. If you set relay 1 for key number 8 then you MUST change relay 2 to different key number even though relay 2 is not used.

1. Log-in to programming
2. Enter 40 then #
3. Press 1-9 (9 is default setting) then press #

**Function Code 41 DTMF Relay 2**

By default the DTMF remote opening relay 2 (door 2) key number is set to 8 means pressing 8 will remotely trigger relay 2 (door 2). The number can be changed by selecting 1-9 to trigger relay 2 (door 2). **Note:** by default remote access for relay 1 is set to 9, see function code 42. If you set relay 2 for key number 9 then you MUST change relay 1 to different key number even though relay 1 is not used.

1. Log-in to programming
2. Enter 41 then#

3. Press 1-9 (9 is default setting) then press #

**Function Code 42 Relay 2 Mode**

Relay 2 can be set to four different mode: 1= door control, 2= trigger simultaneously as relay 1, 3= alarm mode (see function code 24), 4= turn relay 2 on/off remotely (DTMF key 7/6)

1. Log-in to programming
2. Enter 42 then#

3. Enter 1= door control, 2=trigger simultaneously as relay 1, 3= alarm mode (see function code 24), 4= turn relay 2 on/off remotely (DTMF key 7/6), then press #

**Function Code 43 Do Not Disturb Time Zone**

If you do not want to be disturbed from someone calling you from the system during certain hours of the days, you can create Do Not Disturb Time Zone. For example: 22:00-06:00 Monday-Sunday. Up to 10 Do Not Disturb Time Zones ca be programmed.

1. Log-in to programming
2. Enter 43 then #
3. Enter 0-9 then press 

4. Enter 0= delete, 1= add then press 

5. Enter start time (military time) the press 

6. Enter end time then press (military time, end time must be later than start time, if start time: 22:00 hour and end time: 06:00, two time zone must be created (22:00 hour - 24:00 hour, 00:01 hour 06:00 hour) 

7. Enter 
   0= Sunday, 1= Monday, 2= Tuesday, 3= Wednesday, 4= Thursday, 5= Friday, 6= Saturday then press 

8. Return to step 3 to program another time zone

**Function Code 44 Disable Time Zone Relay**

The system's relay can be disabled during certain time but the system is still in full operation. Maximum 10 disable time zones.

1. Log-in to programming

2. Enter 44 then 

3. Enter 0-9 then press 

4. Enter
   0= Delete the existing time zone then press 

1= add new time zone then press #

5. Enter start time in military then press #

6. Enter end time in military then press #

7. Enter
   0 = Sunday, 1 = Monday, 2 = Tuesday, 3 = Wednesday, 4 = Thursday, 5 = Friday, 6 = Saturday
then press #

Return to step 3 to program more time zone

**Function Code 45 Relay 1 and 2 Unlock Timer**

Relay 1 and 2 can be unlock using count down timer 01-98 hours or 00 = lock or 99 = unlimited unlock hold.

1. Log-in to programming

2. Enter 45 then #

3. Enter relay 1 (door 1) then press #

   DOOR1 HOURS:00

   then press #

   or relay 2 (door 2) then press #,

   DOOR2 HOURS:00

   then press #

**Function Code 46 Firmware Version**

To check the system's firmware version

1. Log-in to programming
2. Enter 46 then #

V2.0 09/09/11

Function Code 48 PBX Enable

*If the system is installed behind a Private Branch Exchange (PBX) then 9 is necessary before dialing an outside line. If this function is enabled then the system can only be dialing an outside line, it cannot dial the extension.*

1. Log-in to programming

2. Enter 48 then #

PBX EN[0-1]:0

3. Enter 0= disable or 1= enable then press #

PBX NUM:9

4. Enter the number to access dial tone to dial an outside line, generally 9 is the default number for most PBX system, then press #

Delay[1-5s]:5

5. Select delay time for the PBX system to access dial tone, generally 2-3 second delay is plenty of time, then press #

Function Code 49 Edit Existing Access Code, Temporary Code and Special Code

1. Log-in to programming

2. Enter 49 then #

CODE:_ _ _

3. Editing an Access Code click here or Editing a Temporary Code, click here or Editing a Special code, then click here

Function Code 50 Erase Memory to Factory Default

*Warning: This function code will erase the memory to factory default, no way to restore them unless the database has been saved in the computer.*
1. **Log-in to programming**

2. Enter 50 then #

   MEM DEFAULT(1): _

3. Enter 0= cancel or 1= continue then press#

   MEM DEFAULT WAIT

**Function Code 51 Welcome Screen**

*It consists of three segments and 16 characters for each segment*

1. **Log-in to programming**

2. Enter 51 then #

   ***PRESS 3 or 6

3. 1st segment, enter the characters then press # see Chapter 3 for keypad layout

   _to scroll. Pres

4. 2nd segment, enter the characters then press # see Chapter 3 for keypad layout

**CHAPTER 5**

**Operations**

**5.1 Call from the System**

1. **Intercom Mode**: press #
2. **Call Forwarding Mode**: press 3 or 6 to scroll name then press # to call the selected name

**5.2 Opening Door Remotely**

Relay 1 (door 1), press 9
Relay 2 (door 2), press 8

**5.3 Opening Door Using Access Code, Temporary Code, and Special Code**
Access code Standard Operation is keyless entry code to open the door and door will be closed automatically, see function code 06.
Temporary Code is used for limited number of times, maximum 10 times then the code will be expired, see function code 33.
Special Code is used to unlock hold door and then use same code to lock the door, see function code 34.

Press * (display will stop scrolling) then press the 4, 5, 6, 7 or 8 digit access code as programmed on Function Code 09.

5.4 Opening Door Using Card, Temporary Card, and Special Card

The Quantum QR5-QR5FF-QR5IP-QR5IPFF has built-in card reader. The door can be access using UFOB, UCLAM or UISO.
Card Standard Operation is used to open the door and door will be closed automatically, see function code 10.
Temporary Card is used for limited of times, maximum 10 times then the card will be expired, see function code 35.
Special Card is used to unlock hold door and then use same card to lock the door, see function code 36.

Pach and Company UFOB, UCLAM and UISO must be used to have access to the card reader. Other manufacturers card will not work.

Swipe the card as shown below. The card reader antenna is mounted behind the black square window.

5.5 Opening Door Using Transmitter, Temporary Code Transmitter, and Special Code Transmitter

The Quantum QR5-QR5FF-QR5IP-QR5IPFF has built-in Radio Frequency (RF) Receiver. The transmitter will work in 300 feet radius open air with the transmitter antenna fully extended. The distance may vary depending on the environment.
Transmitter Standard Operation is used to open the door and door will be closed automatically, see function code 10.
Temporary Transmitter is used for limited of times, maximum 10 times then the transmitter will be expired, see function code 35.
Special Transmitter is used to unlock hold door and then use same transmitter to lock the door, see function code 36.

Pach and Company RF Transmitter must be used to have access to the card reader. Other manufacturers transmitter will not work.
5.6 Extending Talk Time

The talk time timer is set on function code 27. The warning beep will be heard one minute before the talk time is expired. It can be extended more another full cycle by pressing #

5.7 Call the System from Premise Location

The system must be installed in Intercom and Call Forwarding Mode Wiring Diagram and also see function code 37 to select ## or ** to initiate premise call. If ** is selected then the homeowner will not have two ways communication, see table below

<table>
<thead>
<tr>
<th>CALL TO THE SYSTEM</th>
<th>Press ##</th>
<th>Press **</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two way communication</td>
<td>Press *</td>
<td>Not applicable</td>
</tr>
<tr>
<td>Open cycle</td>
<td>Press 9</td>
<td>Press 5</td>
</tr>
<tr>
<td>Open hold</td>
<td>Press 8</td>
<td>Press 4</td>
</tr>
<tr>
<td>Close</td>
<td>Press 7</td>
<td>Press 3</td>
</tr>
</tbody>
</table>

5.8 Call the System from Remote Location

1. The system must be install in Intercom and Call Forwarding Mode Wiring Diagram or Call Forwarding Mode wiring Diagram
2. Function code 38 must be set at least for 1 ring
3. Function code 39 must be set to 1
4. You must have the system phone number
5. Call the system phone number if the system answered, short beep will be heard.
6. Press # then 4-digit Master code (default is 0000), short beep will be heard if master code is accepted
7. Press * to establish two ways communication
8. Press 9 to release relay 1 (door 1) or 8 to release relay 2 (door 2).

5.9 Call Waiting
This is not a telephone company call waiting. Telephone company call waiting must be subscribed from your local phone company. You must do the following to enable the call waiting:

1. Function Code 38 must be set at least 1 ring, recommended 9 rings if you have voice mail or other types of answering device interfacing with the same phone line.
2. Press 0 on your phone to transfer between the calls.

CHAPTER 6
QWCM Internet IP Module

The QWCM is only applicable for QR5IP. Click here for complete manual for QWCM
